Subject: Risk assessment evaluation for chemical constituents
Attachments: removed.txt; Question B_020117.docx; Risk Assessment Appendix_Formatted.docx; FourthFYR_ARARs.xlsx

All:

Please find attached two files that contain the risk assessment evaluation for chemical constituents for the Rocky Flats FYR report. The content of these files will be discussed at the upcoming FYR Team meeting on Feb. 7th. Please review for content only as these files have not been tech edited. Note that the files do not contain text regarding the radiological portion of the FYR risk assessment evaluation.

The first file contains the chemical portion of the answer to Question B in the main body of the report. The first file also contains a table (Table 4) that presents the RAO status, which provides a summary of the data considered in answering Question A of the report. The second file contains the chemical portion of the Risk Assessment appendix to the FYR report.

I will send out a final agenda for our meeting next week on Monday. I am hoping we can discuss any comments EPA and CDPHE may have on the ARARs table provided at the December meeting (also attached) at our Tuesday meeting as well.

Many thanks.

Patty
